## City of Scottsdale Green Building Program

January 2013

Anthony Floyd, AIA, LEED-AP  
City of Scottsdale  
Office of Environmental Initiatives

# Scottsdale Environmental Initiatives

1. Indian Bend Multi-Use Wash
2. Environmentally Sensitive Lands Ord.
3. Natural Area Open Space
4. McDowell Mountain Preserve
5. Sensitive Design Principles
6. Green Building Program

SCOTTSDALE

# Green Building Program

- Established in 1998 as a voluntary program for private sector development
  - staff and citizen initiative
- Rating criteria
  - residential and commercial projects
- Verification Process
  - integration with building plan review, permits and inspections
- Green Building Advisory Committee
  - program input, policy development and outreach

# Green Building Program Incentives

- Expedited review & process assistance
- Market differentiation for builders & designers (directory and signs)
- Promotion material, education & public events

# Lectures and Workshops

**SCOTTSDALE**

**GREEN BUILDING PROGRAM**

**2011-2012 Green Building Lecture Series**

at **Granite Reef Senior Center**

1700 N. Granite Reef Northwest corner of McDowell & Granite Reef

*Free Admission*

**Sept 1, 2011 - 7:00 to 8:30 pm**  
**What Happens When Green Becomes Code?**  
Scottsdale City Council recently adopted the International Green Construction Code (IgCC) as the core of the city's voluntary Commercial Green Building Program. Learn about the IgCC and how it will make it easier for developers of commercial and multi-family housing to "go green."

**Oct 6, 2011 - 7:00 to 8:30 pm**  
**Energy Efficiency Technologies**  
Can advances in technologies reduce or even reverse negative impacts on our natural resources and environment? Hear about new and cutting-edge technologies that reduce our energy consumption, curtail our reliance on external energy sources and lower our energy bills.

**Nov 3, 2011 - 7:00 to 8:30 pm**  
**Sustainable Cities**  
Can cities exist in balance with our Sonoran desert ecosystem? Scottsdale planning staff will discuss on-going efforts to protect our desert ecology, mitigate the urban heat island effect, increase pedestrian connectivity, enhance bicycle mobility, support urban compact development, and minimize nighttime light pollution.

**Dec 1, 2011 - 7:00 to 8:30 pm**  
**Rainwater and Graywater**  
Is there enough annual rainfall in the desert to collect and reuse? Is rainwater the same as stormwater? What is graywater and what can we do with it? Learn about successful rainwater harvesting and graywater projects and what you can do to reduce demand on the desert's most precious resource.

**Feb 2, 2012 - 7:00 to 8:30 pm**  
**Green Neighborhoods**  
Green isn't just about buildings. Hear about efforts to create compact, walkable, mixed-use neighborhoods and spaces that encourage social interaction. Explore community gardens that promote a sense of community and physical activity while providing access to fresh, locally grown produce.

**Mar 1, 2012 - 7:00 to 8:30 pm**  
**Cooling and Heating Options for Your Home**  
Did you know that 43% of all electricity consumed in Phoenix metro area homes is used for air conditioning? How can you improve the comfort of your home and reduce the energy required to cool and heat? Find out about new and alternative cooling and heating systems. Learn how to improve your existing system.

**Apr 5, 2012 - 7:00 to 8:30 pm**  
**Water Saving Technologies**  
Did you know that 70% of city-supplied potable water is used primarily for landscape irrigation and 30% of the remainder is used for flushing toilets? Learn about EPA's WaterSense plumbing products and irrigation technologies that can reduce your water consumption by 20-30%. Obtain landscaping tips to reduce irrigation needs while providing a healthy and beautiful environment.

**May 3, 2012 - 7:00 to 8:30 pm**  
**Indoor Environmental Quality and Healthy Homes**  
Air pollutant levels inside an energy efficient tightly-sealed home can be six times higher than outdoor levels. Learn strategies to improve indoor environmental quality and well-being, including tips on material selection, green labeling, fresh air ventilation, filtration and daylighting.

**Jun 7, 2012 - 7:00 to 8:30 pm**  
**Innovative Green Projects in the Valley**  
Are you ready for the future? Explore innovative and trendsetting projects that excel in energy efficiency, material resources, water reuse, and unique building design solutions.

For more information on the Green Building Lecture series

- **Green Building Lectures**
  - 1<sup>st</sup> Thursday of each month
  - avg. attendance is 45
- **Solar Lectures**
  - 3<sup>rd</sup> Thursday of each month
  - avg. attendance is 25

# Scottsdale Building Trends 1998 – 2012

## ● Energy Efficiency

- Cathedralized attics (insulation at roof deck)
- All buildings constructed from 2006 to 2012 are 15% or more efficient than national energy code (2006 IECC)
- Adopted 2012 Energy Code is 30% more efficient

## ● Heat Island Mitigation

- Shaded building entrances, courtyards, outdoor living spaces and limited hardscape surfaces

## ● Water Efficiency

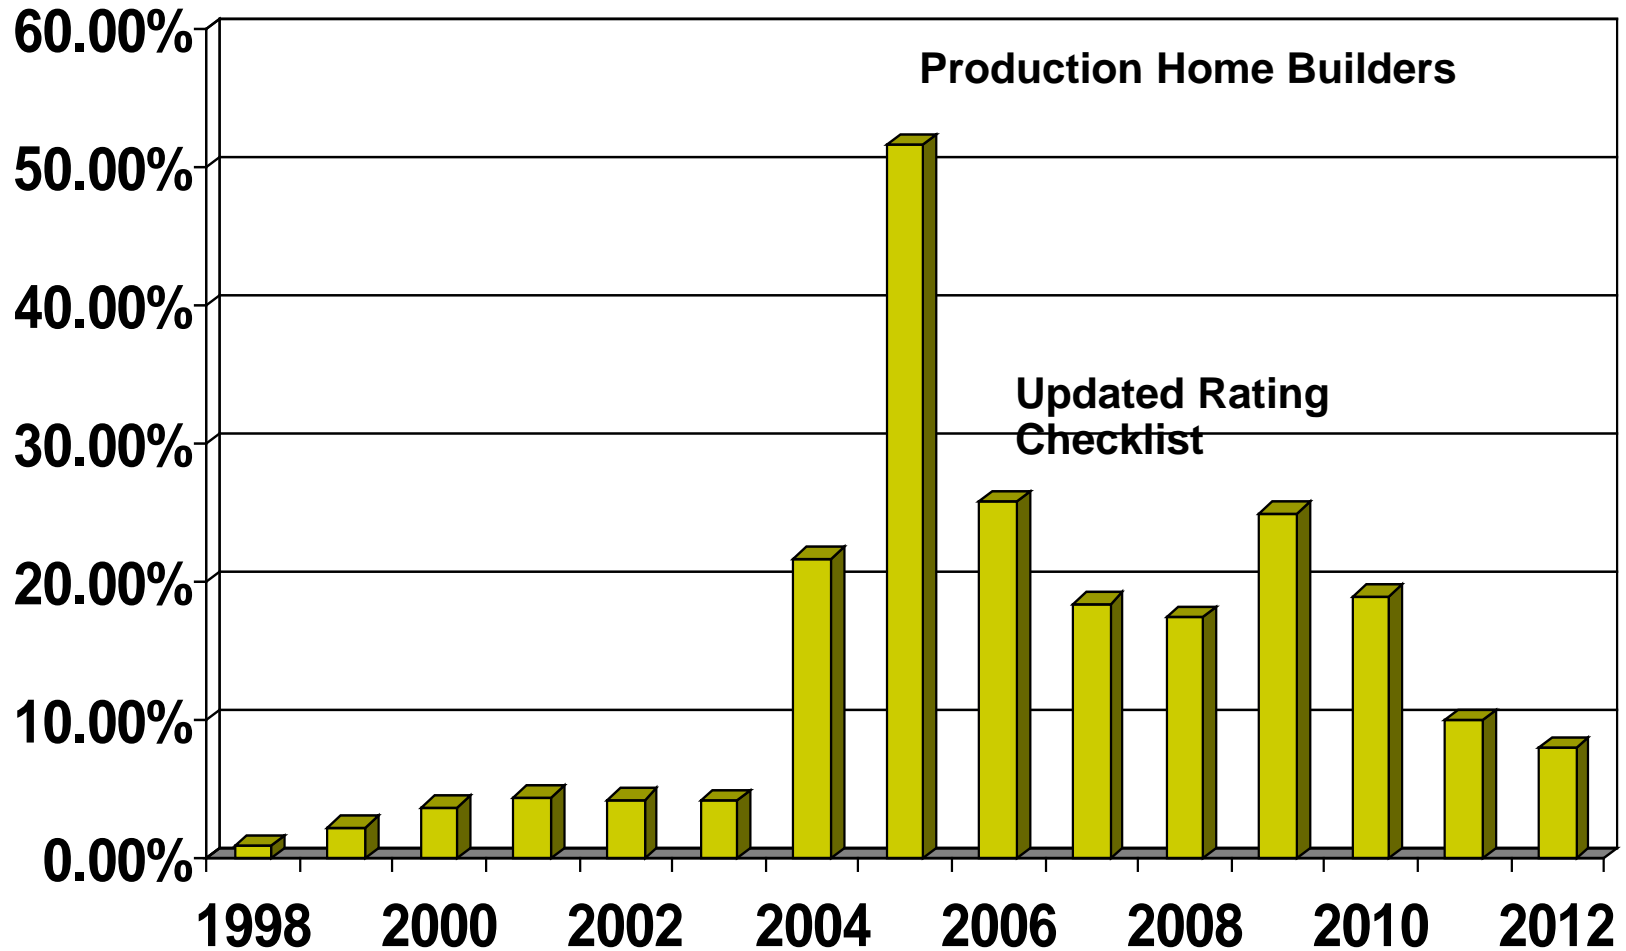

- Xeriscaping and efficient irrigation systems
- High efficiency plumbing fixtures
- Hot water circulation systems

## ● Active Solar Systems

- Significant increase in permits for photovoltaic (solar electric) and solar hot water system

# Energy Performance of Scottsdale Green Homes

Estimated energy savings and equivalent greenhouse gas reduction resulting from houses completed under the Green Building Program.

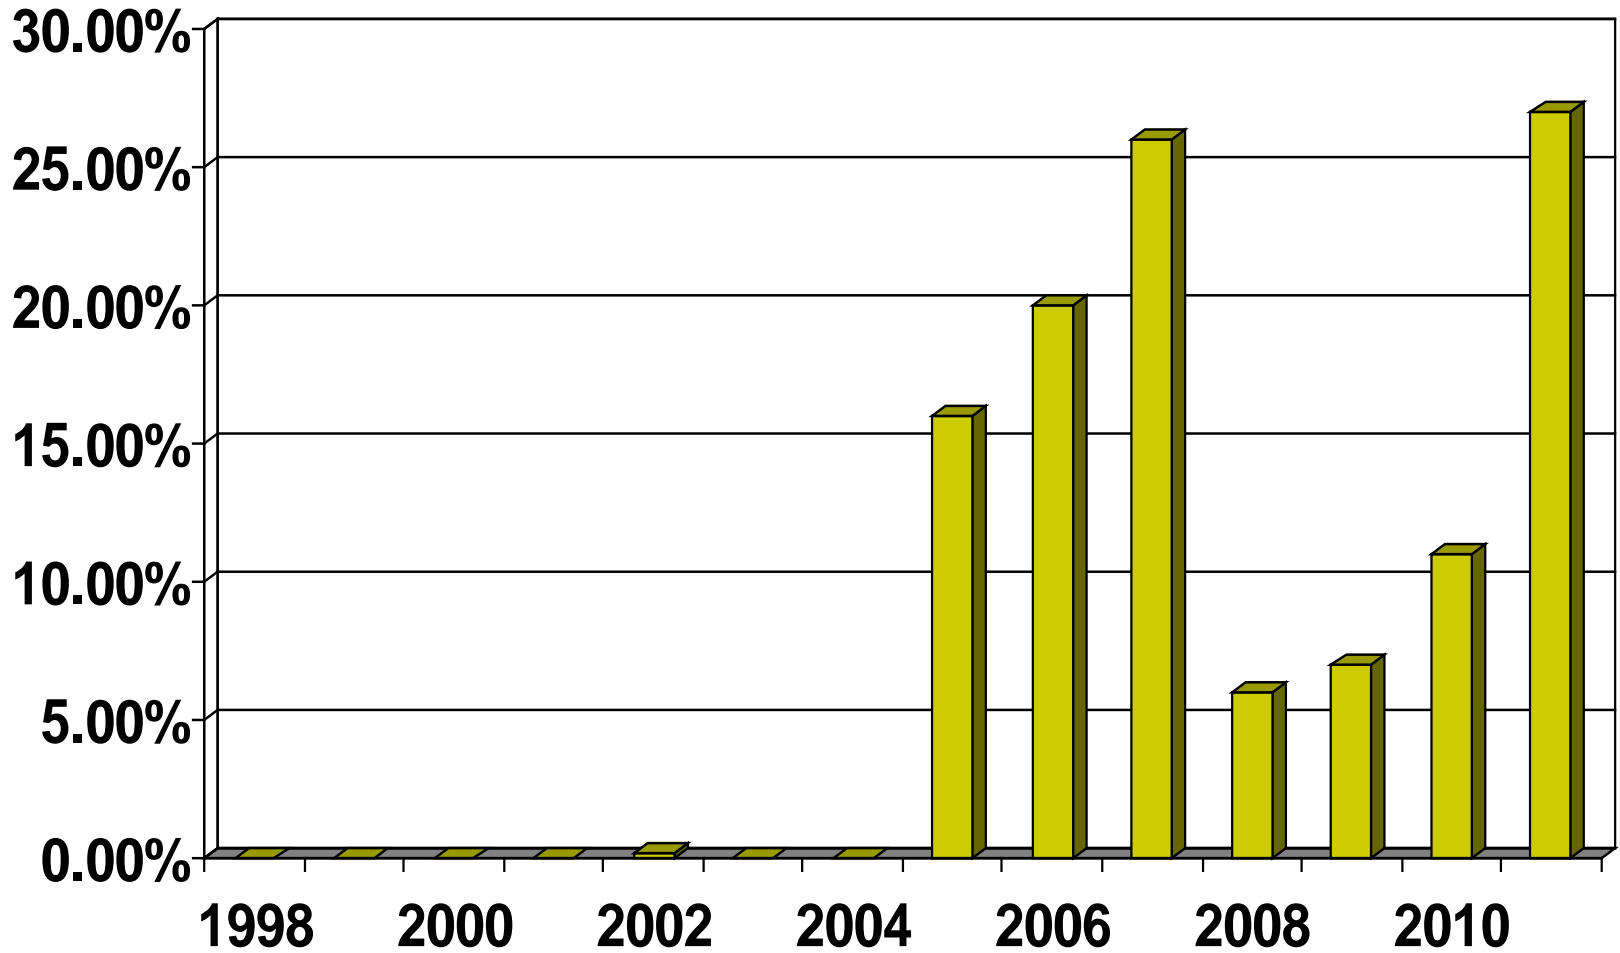

Green Home Energy Measures	Savings and Pollution Reduction	
	1998 to 2012	
	Per Home	Annual Savings for 1,304 homes as of 2012
<b>Small Custom Home Size</b> (based on 2009 energy performance study)	<b>2,700 square feet</b>	
Average Annual Energy Reduction	14,390 Kilowatt hours (kWh) per year	18,764,560 Kilowatt hours (kWh)
<b>Average Annual Energy Savings</b>	<b>\$526 per year</b>	<b>\$ 685,904</b>
Annual Greenhouse Gas Reduction	3 tons of carbon dioxide (CO <sub>2</sub> )	3,912 tons of carbon dioxide (CO <sub>2</sub> ) avoided
Equivalent Cars removed from Street	36% of annual emission of average car (8.25 tons/year)	469 cars

# Energy Performance of Scottsdale Green Homes

Estimated energy savings and equivalent greenhouse gas reduction resulting from houses completed under the Green Building Program.

Green Home Energy Measures	Savings and Pollution Reduction	
	1998 to 2012	
	Per Home	Annual Savings for 1,304 homes as of 2012
<b>Average Custom Home Size</b> (based on 2009 energy performance study)	<b>5,500 square feet</b>	
Average Annual Energy Reduction	34,670 Kilowatt hours (kWh) per year	45,209,680 Kilowatt hours (kWh)
<b>Average Annual Energy Savings</b>	<b>\$1,598 per year</b>	<b>\$2,083,792</b>
Annual Greenhouse Gas Reduction	7 tons of carbon dioxide (CO <sub>2</sub> )	9,128 tons of carbon dioxide (CO <sub>2</sub> ) avoided
Equivalent Cars removed from Street	85% of annual emission of average car (8.25 tons/year)	1,108 cars
